

WHAT IS CLAIMED IS:

1. A headset comprising:
a support member for attachment to an ear of a user;
a speaker transducer that outputs sound in response to a sound signal;
5 and
a deformable clip connected to the transducer and configured to permit attachment of the transducer to the support member.
2. A headset as recited in claim 1, wherein said clip is formed with a U-
10 shaped section located between a pair of opposed legs and wherein the support member is clamped between said opposed legs.
3. A headset as recited in claim 1, wherein said support member is substantially planar.
15
4. A headset as recited in claim 3, wherein said support member is formed from a flexible material.
5. A headset as recited in claim 4, wherein said support member includes
20 curved slot to allow the support member to be hung from the ear of the user.
6. A headset as recited in claim 1, further including a microphone transducer that outputs a speech signal in response to sound, said microphone transducer being connected to said clip.
25
7. A headset comprising:
a substantially planar support member for attachment to an ear of a user; and

a body including a speaker transducer that outputs sound in response to a sound signal and a microphone transducer that outputs a speech signal in response to sound, said body further including a deformable clip, said body being connected to the support member by said clip.

5

8. A headset as recited in claim 7, wherein said support member is flexible and includes a curved slot to allow the support to be hung from the ear of the user.
